To Whom It May Concern:

In 2005 Diageo- Gimli, Manitoba plant engaged OEM consultants to provide consulting services on the launch of a lean initiative. The OEM team began an ongoing 5S project with the goal of improving organization in the plant's various work areas.

OEM provided training, project co-ordination and feedback to the management team and employees. The unbiased feedback was helpful in charting the course for future activities.

Change management is a long road; OEM was willing to give frank timely feedback. This feedback is invaluable in setting expectations and charting a realistic plan for the future.

Sincerely,

Kevin Rogers  
Director – Engineering and Maintenance  
Diageo Canada Inc.
