

Alberta Employment, Immigration and Industry (AEII) is mandated to promote greater productivity for Alberta companies and to encourage the adoption of innovative business processes to enhance competitiveness. AEII has initiated a pilot program with OEM Consultants to provide distance learning (LEAN 101) to industries located in the peripheral regions of the province.

Transform your company today! It all starts with educating your employees. A commitment must be made by your company to engage its key employees in this process, and only companies serious about following through on receiving this education will be considered.

You will receive:

1. Coaching by OEM Consultants on how to implement LEAN changes
2. Up to ten (10) registrants for OEM's LEAN101 "on-line" course (Note: The OEM LEAN 101 on-line modular structure and 24/7 availability makes it easy for participants to take the course at convenient times - either at work or at home.)
3. A certificate of completion for each course participant
4. Mentoring through the process to ensure that you receive expected gains.

This offer is limited to companies interested in:

- Revenue growth
- Increased productivity
- Worker involvement and retention
- Enhanced customer satisfaction
- Reduced time loss due to accidents
- Decreased operating costs
- Focused company strategy
- Better communication skills
- Team building benefits

Register with OEM Consultants today!
Phone: 1-800-814-8006 (toll-free)

AEII also offers the LEAN Enterprise Assessment Program - designed to promote LEAN thinking in Alberta companies. Under this initiative, Alberta companies can receive support including an on-site LEAN assessment, training and implementation assistance. To find out more, please go to www.alberta-canada.com/manufacturing

"LEAN 101 provides excellent awareness of the principles and processes required to sustain a low cost, high quality manufacturing operation. I recommend it for all Senior Management Teams even if you think you are already there!"

-Michael J. Evans, President, CGI Automotive Group
